

HERMES
LANDSCAPING

Making Our World More Beautiful Since 1965

Sprint Center Kansas City, MO

INTEGRITY.

STEWARDSHIP.

EXCELLENCE.

VALUE.

COMMITMENT.

The Sprint Center project involved the installation of the landscape and irrigation systems for a large arena in downtown Kansas City, MO. Along with streetscape and landscape installation, other work Hermes performed included topsoil install and final grading of the green areas on site. The project was particularly challenging due to a compressed production schedule and the urban nature of the site, which allowed for almost no staging area on site and created the need for traffic control on streetscape areas, where there was a non-stop flow of vehicles. Today the Sprint Center is Kansas City's top large arena for concerts, sports, and other events.
